

MOBILE APPLICATION DEVELOPMENT

Assignment 02: Bottom Tab Bar, Splash Screen and App Icon

Student Name	Malika Naseer
Roll Number	ADP CS 16
Project	Restaurant App — React Native Expo
Total Marks	10
Due Date	10 October 2026

Project Overview

This project extends the existing Restaurant React Native Expo application. The app contains a customized restaurant splash screen and app icon, and a bottom tab bar with Home, Explore, Menu, and Profile screens. Each screen displays restaurant-related content.

Assignment Requirements and Work Completed

1. Bottom tab navigation: Home, Explore, Menu, and Profile tabs are visible in the app.
2. New screen: the Explore screen contains a title and meaningful restaurant information, including Fresh Food, Popular Dishes, and Visit Us.
3. Splash screen: a restaurant-themed splash image is displayed when the app opens.
4. App icon: a custom restaurant icon is shown for the app.
5. Themed components: the project includes themed component files; verify all relevant View and Text components use ThemedView and ThemedText where required by the instructor.
6. Android APK: Expo EAS build completed successfully with the artifact type APK.

Submission Links

APK note: The build artifact was downloaded to the computer. If a direct APK link is required, upload the APK to the submission platform or a shareable cloud location and paste that direct link in the submission form.

Evidence 1: VS Code Project Folder and Home Screen Code

The screenshot shows the Visual Studio Code interface with a project named 'restaurant'. The Explorer sidebar on the left displays the file structure, including folders like 'dist', 'node_modules', 'scripts', and 'src', and files like 'app.json', 'export logo.png', 'index.tsx', 'menu.tsx', 'profile.tsx', 'reset-project.js', 'src', 'ui', and 'themed-text.tsx'. The main editor area shows the 'index.tsx' file, which contains the following code:

```
1 import { StyleSheet, Text, View, ScrollView } from 'react-native';
2
3 export default function HomeScreen() {
4   return (
5     <ScrollView style={styles.container}>
6       <Text style={styles.title}>Welcome to My Restaurant</Text>
7       <Text style={styles.subtitle}>Delicious Food - Fresh & Tasty</Text>
8
9       <View style={styles.card}>
10        <Text style={styles.food}>🍔 Burger - Rs. 500</Text>
11      </View>
12      <View style={styles.card}>
13        <Text style={styles.food}>🍕 Pizza - Rs. 1200</Text>
14      </View>
15      <View style={styles.card}>
16        <Text style={styles.food}>🍝 Pasta - Rs. 800</Text>
17      </View>
18    </ScrollView>
19  );
20 }
21
22 const styles = StyleSheet.create({
23   container: { flex: 1, padding: 20, backgroundColor: '#fff' },
24   title: { fontSize: 26, fontWeight: 'bold', marginTop: 40 },
25   subtitle: { fontSize: 16, color: 'gray', marginBottom: 20 },
```

The bottom status bar shows the file is 'index.tsx' at line 25, column 63, with 2 spaces, UTF-8 encoding, and LF line endings. The bottom right corner shows the 'Go Live' button.
